Јавни тестови

У наставку су дати улази и очекивани излази који представљају јавне тестове пројектног задатка. Да би пројектни задатак био прегледан, програм мора да изврши све јавне тестове без грешака. Програм који има грешку у јавним тестовима биће одбачен без даљег прегледања.

Улаз	**Очекивани излаз**
`$ echo "Hello World!"`	`Hello World!`
`$ echo input.txt`	`A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become an executable program, which is executed when the C++ implementation calls its main function.`

`$ echo`
`Hello World!`
`How are you?`
`EOF`
	`Hello World!`
	`How are you?`

`$ echo <hello.txt >out.txt` `$ echo <hello.txt >>out.txt`	`(sadržaj fajla out.txt)` `Hello World!Hello World!`
`$ prompt "?"` `? prompt "#"`	
`$ time`	`19:20:45` `(format vremena sme da se razlikuje)`
`$ date`	`12.12.2025.` `(format datuma sme da se razlikuje)`
`$ touch tout.txt` `$ touch tout.txt`	`Greška! Fajl već postoji!` `(ispis greške sme da se razlikuje)`
`$ echo <hello.txt >empty.txt` `$ truncate empty.txt`	`(sadržaj fajla empty.txt je prazan)`

$ touch temp.txt $ rm temp.txt	(direktorijum ne sadrži fajl temp.txt)
$ wc -w input.txt	36
$ wc -c Hello World! How are you? EOF	26
$ wc -w Hello World! How are you? EOF	5
$ tr -" " Hello World! How are you? EOF	HelloWorld! Howareyou?
$ tr input.txt -"execut" "E"	A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become an Eable program, which is Eed when the C++ implementation calls its main function.
$ head -n1 Hello World! How are you? EOF	Hello World!
$ batch basic_commands.txt	(sadržaj fajla test.txt) time: 19:20:45 (format vremena sme da se razlikuje)

$ batch red_commands.txt >batch.out	(sadržaj fajla batch.out) Done (sadržaj fajla redirect_test.txt) time: 19:20:45 (format vremena sme da se razlikuje)
$ batch cmd_commands.txt Hello World! How are you? EOF	Hello World! How are you?
$ echo "I love programming in C!" | tr -"C" "C++" | wc -c	26
$ batch all.txt Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF #	(standardni izlaz) Hello World! A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become an executable program, which is executed when the C++ implementation calls its main function. Hello World! How are you? 19:20:45 12.12.2025. Greška! Fajl već postoji! 36 26 5 HelloWorld! Howareyou? A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become

	an Eable program, which is Eed when the C++ implementation calls its main function. Hello World! Hello World! How are you? 26 (sadržaj fajla out.txt) Hello World!Hello World! (sadržaj fajla empty.txt je prazan) (direktorijum ne sadrži fajl temp.txt) (sadržaj fajla test.txt) time: 19:20:45 (sadržaj fajla batch.out) Done (sadržaj fajla redirect_test.txt) time: 19:20:45
